

Calvary Homes continues to be committed to the ongoing safety and health of all our residents and team members as we all deal with the COVID-19 virus. All our team members continue to follow all infection control procedures.

At the present time we have no residents in our health care that have COVID and are not being quarantined. Residents in our Baumgartner Personal Care unit are under quarantine until 2/25 due to a team member testing positive for the virus. We continue to do weekly testing for our residents in both health care and personal care.

We continue to conduct COVID testing twice a week for our health care team members and once a week for our personal care team members due to the positivity rate being above 10% (on 2/16 the rate was 10.7%). We have some team members that are out due to either having been exposed directly with someone who has the virus or are having symptoms for the virus and are waiting results from being tested.

We understand that communicating and seeing your loved one is important and we continue to offer ways to get you connected through video communications with the use of Facetime, Skype, or Facebook. If you are interested please contact Tiffany Phy (Dir. Of Social Services) at 717-827-88136 or Lindsay Doughty (HC social worker).

Thank you for your prayers. Thank you for your patience and support as we work together to keep our residents safe.
